Your Research Project

In the project you have in mind, how many partners are there?:

Please comment on the potential usefulness to your project of the following types of MBS service:

Permanent virtual circuits (PVC) between pairs of partners:

Intermittent-periodic VCs (ie VCs set up and closed down
at regular times scheduled in advance):

VCs intermittently at irregular intervals (ie on demand):

What is the maximum notice period for establishing a set of VCs that you would consider
reasonable for:

Permanent virtual circuits:

Intermittent-periodic VCs:

VCs on demand:

What is the maximum number of PVCs you would wish to use at any time?:

What is the average capacity requirement (in Mbit/s) for individual PVCs?:

What is the maximum capacity requirement for any PVC?:

What kind of applications would you run using MBS?:

Which network protocols (including IP) would you use?

Assuming that no major bottlenecks appear as the load on the TEN-155 IP service increases, do you consider that this service alone will meet your project's needs?

If not, please say why:
