

## Future of MailFLOW

- Enough support for 1996
- But...for a lightweight service
- and lower contributions

## **MaiFLOW basics (here to stay)**

- Mapping tables
- Routing tables (access control?)
- Tools maintenance

## Lower profile features

- Information services (ftp etc)
- Mailing lists
- Manager meetings
- Reports

## Phase-out features

- Service monitoring
- Problem solving
- Newcomer support
- Travel budget

## 1997 and onwards?

- Early review in March 1996
  - continuation using static tables
  - using DNS
  - using X.500
- Commercialisation
